datascience_assignment_1.3

July 9, 2018

0.1 Program to accept users first name and last name and display in reverse order with a space

0.2 Solution

- Input first name and last name as string
- Strip and concatenate last name and first name strings and print

```
In [3]: first_name = input("Enter your first name: ")
        last_name = input("Enter your last name: ")
        print(last_name.strip() + " " + first_name.strip())

Enter your first name: Monimoy
Enter your last name: Purkayastha
Purkayastha Monimoy
```
